BEAM

Central Vacuum Systems

CENTRAL TO YOUR HOME

THE BEAM STORY

Your home is at the centre of it all. It is where you dine, nest, nurture, and gather. You invest in it because it safeguards your family, provides a source of pride and is central to your family's everyday life.

At BEAM, we understand that special connection. We are at the heart of creating a clean environment and letting you enjoy your home. We are part of every chapter, helping you and your family flourish.

BEAM ... Central to your home

MY HOME, MY BEAM

Your home is filled with love and kindness. It protects you and fosters an environment where your family can grow, learn and enjoy life's special moments.

BEAM is at the heart of that special relationship between you and your home. We help create a clean environment that delivers a sense of pride, provides protection and is central to your home.

INVESTED IN YOUR HOME

We believe you deserve a clean and fresh home. We build in convenience and provide the tools that fit your life. Discover why investing in a Beam Central Vacuum is the top choice for proud homeowners.

60 YEARS OF EXCELLENCE

For over 60 years internationally and over 30 Years in New Zealand, BEAM has been a leading manufacturer of central vacuum systems, and the award winning BEAM Alliance is the latest series in a long line of innovative products to raise the bar.

Best-in-class products are now available in over 50 countries!

BEAM buyers do so with confidence. When you simply want the best in your home, you'll want a BEAM.

BEAM NZ

BEAM NZ covers New Zealand with 25 certified dealers from North Cape to the Bluff. You are not only dealing with your local dealer, you have the backup and support of BEAM not only in New Zealand, but worldwide.

When only the best will do, buy a BEAM.

CENTRAL TO YOUR HOME

COMFORTABLE CLEANING

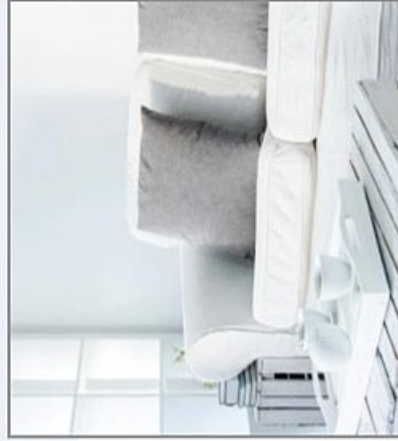

With BEAM, vacuuming is light housekeeping, no weight-lifting exercise or obstacle course.

A lightweight hose and ergonomic tools let you move easily from task to task, level to level, floor to ceiling, and up stairs, without getting a sweaty workout from dragging around a heavy portable vacuum. The average portable vacuum weighs 7kg while a BEAM hose and handle is only 3kg. Which would you rather lift to clean your stairs with?

PROVIDES A CLEAN AND FRESH HOME

Dirt, debris, and allergens can all be found in our homes. With powerful suction, lightweight, versatile convenience and durability, BEAM Built-in Vacuum Systems are designed to help remove these substances from your living space.

THE QUIET WAY TO CLEAN

The innovative D-shaped nozzle design allows for quieter operation and superior suction and with the power unit located away from the living area, the quiet hush of airflow is all you'll hear. This means that you can easily vacuum without disturbing anyone.

BUILT-IN CONVENIENCE

A built-in BEAM Central Vacuum System is easy to manoeuvre around furniture and doorways, up stairs, and from room to room without having to lift a heavy upright vacuum or drag a canister around behind you. With convenient cleaning tools on board, you always have the right tool for the job.

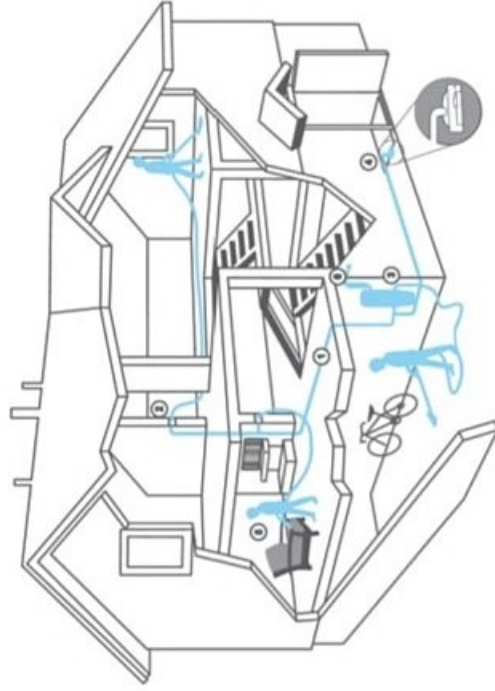

HOW A CENTRAL VACUUM WORKS

BEAM Built-in Vacuum Systems use specifically designed airflow tubing installed in the walls of your home to carry 100% of the contacted dirt, dust and allergens away from living area to the central power unit commonly located in the garage, cupboard or basement.

To activate the system, simply insert the lightweight hose into a central vacuum plug in point. Most homes will have an average of three plug in points. The flexible lightweight hose and plug in system allows you to easily move from room to room without having to push a heavy upright vacuum or pull a canister vacuum behind you, commonly bumping into walls or valuable furniture.

BEAM Built-in Vacuum Systems are much quieter than portable vacuums as the power unit of a central vacuum is located outside of the living area, where the noise of a portable vacuum is in the same room that you clean.

A BRIEF HISTORY

Focused on clean

In 1957, BEAM Manufacturing Company was sold, and BEAM Industries emerged with R.L. Sampson at the helm. The company focused solely on central vacuum systems. And over the next 60 years has emerged to become the undisputed technology and market leader in the central vacuum industry. The acquisition of BEAM in 2018 cemented Nuera Air as the global power in central vacuums.

A global leader

Currently, about one-third of all central vacuum systems in the world are produced by BEAM. Our vision is to work toward making central vacuum systems a staple in new homes and to grow BEAM market leadership internationally.

BENEFITS

- The only central vacuum system clinically tested and proven to remove 100% of contacted dirt and allergens from the household environment.
- Exclusive and patented Beam, Gore-Tex™ self-cleaning HEPA standard filter technology, which filters 98.3% of particles down to 0.3 microns.
- Quiet and powerful High Efficiency motor offers higher performance yet uses 30% less energy than other traditional vacuum systems.
- Lightweight hose, accessories and cleaning tools are convenient and easy to use.
- Can be fitted to new or existing homes.
- Double award winning product.

CENTRAL VACUUM VS. PORTABLE: NO CONTEST

Compare how a BEAM Central Vacuum System beats a portable vacuum.

BEAM Central Vacuum Systems remove air, dirt and dust vacuumed from the home, whereas conventional vacuums may filter dirt and dust but recirculate the same air via the exhaust back into the home.

BEAM Central Vacuums are engineered with larger motors providing powerful suction for a deeper clean.

Less hassle. BEAM Central Vacuums have a self-cleaning filter and a large capacity dirt bucket for less frequent emptying. Portable vacuums have filters that need to be replaced and bags that need to be emptied regularly.

TAKE PRIDE IN YOUR HOME

SMART SCREEN

Illuminated screen helps you monitor the performance of your central vacuum system.

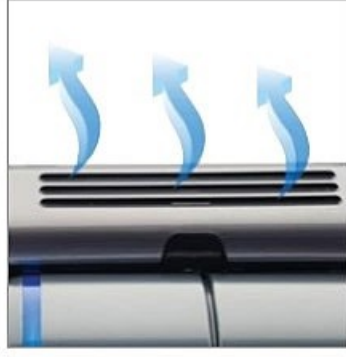

HE MOTOR

A High Efficiency motor is at the heart of every BEAM Alliance system. HE motors offer higher performance using 30% less energy than the traditional central vacuum system using by-pass motors.

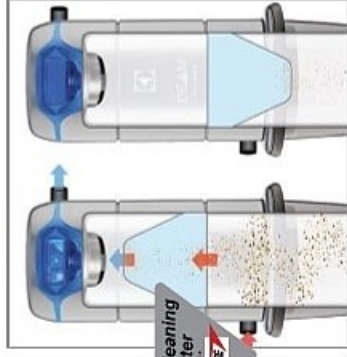

THE HEPA FILTRATION

For 100% filtration the optional BEAM Alliance HEPA filter removes air impurities, so you can breathe easy.

SELF-CLEANING FILTER

The exclusive BEAM Self-Cleaning Filter with GORE-TEX™ technology filters 98.3% of particles at 0.3 microns. The BEAM Self-Cleaning Filter protects the HE motor for prolonged product life, keeping superior suction performance every time.

QUICK CLEAN VALVE

Opens easily with the push of a finger. The Quick Clean Valve is powered and lets you turn on the system from the hose handle. Use for quick clean-ups around your car or workbench area.

PRESS & RELEASE BUCKET

Simply press down on any two points around the ring and pull down to empty the bucket. The bucket easily snaps back into place with one hand.

MEET THE FAMILY

BM285
5 YEAR WARRANTY
